

Oleksandr Surovtsev

Creative designer & developer

My resume

I hope you enjoy it

About me

Hi there ! I am a 30 year old passionate web designer from Ukraine. Making designs has been an outlet for my creativity throughout my life. In addition to traditional art such as pencil drawings I am well versed in digital creations. I love creating web sites, online stores and CRM systems. My career started with a focus on design which later expanded into coding. I've made many sites, systems, video ads, presentations, banners, logos, advertisements and more !

My career started in 2005 where I leveraged my skill set for multiple companies. I was working as the head of Digital Design for Quadrasoft since 2015 and up until the war broke out. I have experience in developing projects of varying complexity: from business cards to advanced CRM systems. I've worked closely with upper management and translated their requirements into successful site promotions. I have the experience and know the process on how to create a product from start to finish. I thrive on co-operation and happily share my knowledge and wisdom. I am looking for a career within a company that will challenge my knowledge and experience. I'm very motivated and willing to learn!
